

Customs Trade Partnership Against Terrorism (CTPAT) Statement of Support

Swire Shipping is a certified member of CTPAT with a firm commitment to supply chain security.

CTPAT is a joint government-business initiative supported by the Department of Homeland Security and U.S. Customs and Border Protection. The objective of CTPAT is to improve global supply chain security by developing voluntary cooperative relationships with various supply chain partners. As a CTPAT partner, Swire Shipping works with U.S. Customs and Border Protection (CBP) to protect the supply chain, identify security gaps, and implement specific security measures and best practices.

Our executive team affirms the CTPAT minimum-security criteria (MSC). We also support the teams in Swire Shipping North America that are responsible for maintaining and executing our security protocols. All Swire Shipping employees are expected to fully adhere to the CTPAT-aligned security processes.

CTPAT brings the responsibility for supply chain security to every individual. Swire Shipping encourages all our business partners to enrol in this program. We are fully committed to supporting the mission of CTPAT and sharing the benefits of participation with our customers.

Swire Shipping is proud to support the CTPAT community and will continue its efforts to promote greater supply chain security.
